

mSupply Table

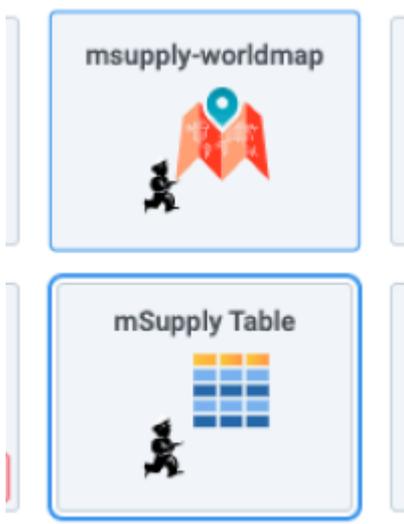

This is a custom panel which will need to be installed on your server. Contact mSupply support if this panel is not available to you. The mSupply table is an extension of the bundled Table plugin, which adds * clickable actions to cells which update filter values * a button which allows exporting the data direct to excel (requires the msupply-dashboard-app plugin also)

Be aware that it also removes the Filter functionality of the bundled table plugin.

The screenshot shows the 'Item Stock' dashboard. On the left, a table titled 'Stock on hand' lists various medical supplies with their unit prices and stock quantities. On the right, a map titled 'Months of stock by Store' shows New Zealand with colored circles indicating stock levels in different regions. Below the table, there are tabs for 'Stores', 'Unit Price', 'AMC', 'Stock on Han', 'Qty 1', 'Batch 1', 'Expiry 1', 'Qty 2', 'Batch 2', 'Expiry 2', 'Qty 3', 'Batch 3', 'Expiry 3', and 'Qty 4'. An 'Export' button is visible at the bottom right of the table.

Item	Unit Price	Stock	Source
RINGER lactate, 500 ml, plastic pouch	0.75	168	LP
HYDROCORTISONE sodium succinate, eq.100mg base, powder, vial	0.54	59	IO
MYHEP DVIR(DACL/SOFO) 60/400mg tab	0	863	Donation
AMOXICILLIN, 250 mg, tab.	0	150266	IO
NEEDLE, 30 G (YELLOW), 13 mm½	0	30	IO

TENOFOVIR (TDF) 300 mg/ LAMIVUDINE (3TC) 300 mg. tab.	0	11832	NAP
ALUMINIUM hydroxide 400mg / MAGNESIUM hydroxide 400mg, tab.	0	256507	IO

To use, select the msupply-table visualisation option:

The new options available in the **Display** section are:

Display

Show header

To display table's header or not to display

Show export button

Display or hide the export to excel option

Export button title

The title of the export button

* **Show export button** toggles display of the export button * **Export button title** which allows customising of the export button text

And the option to link a cell to a variable is per field, so it can be specified as an override to select this for a single column only:

Override 1

Fields with name

Linked Variable

Specify the name of a variable to update when this field is clicked
