Scheduled Emailed Reports

Initial Plugin Setup

- 1. Click on **Settings**on the sidebar menu (on the left-hand side of the mSupply Dashboard).
- 2. Select the **Plugins** tab.
- 3. Search for "mSupply".
- 4. Click on the mSupply option.
- 5. Click **Enable** for the mSupply plugin.

Once enabled, the mSupply icon will be displayed on the sidebar menu above the settings button.

The App Configuration window will open and you will need to complete this form before you start to use the reporting functionality.

Please enter your administrator Grafana Details:

- Username and password
- URL for your mSupply Web Dashboard

Please enter the **Email Details** for the account from which emails will be sent:

- Email address and password
- Email host and port (from your email provider: this will be the same details that you would enter when creating a new email account)

Your email provider's security settings may require additional steps to allow email setup.

For **Datasource**, please select the source location for your mSupply data. In most cases this will be *PostgreSQL*. If you are not sure, please check with your mSupply consultant.

Once completed, please select **Submit**.

Selecting **Disable** will deactivate the mSupply plugin and you will need to repeat the above in order to enable it again.

You are now ready to get started creating Reporting Groups!

Setting Up a Report Group

To access Report groups, select the mSupply icon from the sidebar menu and select **Report Groups** from the drop-down menu.

÷.	B New dashboard		shilt	• • •	 Last 6 hours 	~ Q	G ×	Ð

Edit Report group details page:

dit Report Group		
○ Edit details		DELETE
Name 🔘	New report group]
Group description ③	Description	
O Users		
Q Search for users		Û
NO EMAIL FOR THIS U	SER	
NO EMAIL FOR THIS U	SER	
HTY_B	SER	
Clinic Reviewer	SER	
MLM		

In the Edit details section there are free-text boxes for:

- Name
- Group description

Then select the users that you want to be in your report group.

- A list is provided of all mSupply users
- mSupply users without an email address will appear in the list but are not selectable

New users (or changes to a user's details) will only be updated from mSupply into the Dashboard

every 24 hours. If you require an immediate update for Reports, please complete a manual export from mSupply to the Dashboard.

To save and close press the **X** in the top right corner.

Delete will remove the group. You will receive a prompt to confirm deletion.

Setting Up a Report Schedule

To access Report schedules, select the mSupply icon from the sidebar menu and select **Report schedules** from the drop-down menu.

	Description	0	Description		Report time	O	00:00 ~			
	Report group	0	Choose	~	Report day	0	1			
 Available Panels Transactions per Store Overall Status Last 10 Temp Records 										
Stock at risk										
	Stock to b	e disca	rded							

In the Edit details section:

- Name: free-text box that will also be the email subject.
- Description: free-text box
- Report group: select the name of the group that should receive the report
- Report interval: select the required reporting period from the drop-down box

The emails will be sent according to the selected interval from the time the report schedule is created. For example, if a daily schedule is set up

at 9am on 1 January 2021, the email will be sent every day at 9am from 2 January 2021.

Then select from the **Available Panels** to be displayed in the report:

- Any number of panels can be selected. Each panel will be on a separate worksheet in an attached Excel workbook.
- Only "table" panels are supported.

For each panel selected, you will also need to specify the **Variables** to be displayed in the emailed report. This is done via the drop-down boxes that will be displayed once a panel is selected as shown in the below example for Expiry Items.

	Expiry Items						
VARIABLES ()							
	Store	Choose ~					
	Item	Choose ~					

Using the drop-down boxes, you can choose the variables (in this case *Store* and *Item*) that you want displayed in the emailed report. Only the variables displayed within the Report Schedule screen are available for each panel.

The Grafana format of variables must be in the form: ${\rm s}$ or ${\rm s}$. Other formats are not supported for dashboard reports. ¹⁾

Grafana macros are not supported with the following exception:

- The \$_timeFrom and \$_timeTo and \$_timeFilter macros are supported using a Lookback variable. The \$_timeTo date is set to date of report creation. The \$_timeFrom will then be calculated as (\$ timeTo - Lookback).
- For example, if you set a lookback period of 7 days and create a daily report starting on 1 January 2021. The first report's \$_timeFrom will be 24 December 2020 and the \$_timeTo will be 1 January 2021. The second report's \$_timeFrom will be 25 December 2020 and the \$_timeTo will be 2 January 2021. ²⁾

Once you have selected your variables, you can press **Send Test** button (top right corner). Please note:

- **Send Test** will not affect the timing of the schedule (the timing of the schedule is dependent on the time you save and close the report schedule)
- Send Test will send the email to all users in the report group!

To save and close press the **X** in the top right corner.

Delete will remove the group. You will receive a prompt to confirm deletion.

Report Template

The panels selected in a report schedule will be sent via email in an Excel workbook:

- Each panel will be on a separate worksheet.
- Each worksheet will display in the title:
 - Date of Creation
 - Name of the Panel

1)

2)

For more information on variables please refer to Grafana variables

For more information on macros, please refer to Grafana macros
