

Setting up mSupply Mobile on the device

mSupply Mobile can be set up on your Android device by the [mSupply Support Team](#) or by your internal IT team with our support

- [Preparing the device](#)
- [Initialising the store](#)

Please note

- A device is typically allocated to a facility, **NOT** an individual user. As such ALL operating system (i.e. Android) user accounts set up on the device must be for the *site*, not a person. This way, if a person leaves and another person takes over operation of the device, nothing should need to be changed.
- Each device running mSupply Mobile will correspond to **one mSupply Store**.
