

Setting up mSupply Mobile on the device

mSupply Mobile can be set up on your Android device by the [mSupply Support Team](#) or by your internal IT team with our support

Please note

- A device will need to be set up for each site or facility that will be operating on mSupply Mobile e.g. a clinic.
- A device is to be allocated to the site, **NOT** an individual user. As such ALL user accounts set up on the device must be for the site. If an individual leaves another person will take over operation of the device, and nothing should need to be changed.
- In mSupply each site will be set up as what is referred to as **an mSupply Store**.
