

4. Configuring the Store and Dispensing

Making items visible in the new store using Master List(s)

1. Click on the **Master Lists** tab and select at least one Master List. This will define which items are visible in the store.

2. Click **OK**
3. Click **OK** again

Make the Store visible to other Stores

- Edit the 'name' associated with the Store and configure [store visibility](#) to other Stores appropriately

Setting up the correct synchronisation settings

Since [v4.12](#), sync settings are controlled by [store visibility](#). You should not need to do anything described in this step.

If you have used [store_create_from_name](#) for creation of the store, and you have specified the sync site that the store will be **Active** on, then all you need to do here is:

- Change the Synchronisation type for this store on the Primary Server to **Collector** if so desired (normally the case)
- Configure this new store's Sync type to be **Transfer** or **Active/Collector** for any *other* sync sites that need to deal with this store.

1. Edit store synchronisation settings (**Special > Show Stores > Double-click on store > Synchronisation > Click to Unlock**, enter code to edit):
2. In the table below, in row of the Sync site that was created for this store, tick the tickbox in the **Local** column. This will automatically change the Sync type for that site to Active/Collector.

Mobile Store 1

Synchronization Custom fields Master Lists

Synchronisation type: Active store

☐ Set as local store

☐ Include prescriptions in sync

Sync ID: 5

Sync with:

Sync ID	User name	Sync type	Local
7	General	None	<input type="checkbox"/>
6	Hogwarts Dispensary	None	<input type="checkbox"/>
2	Gryffindor	None	<input type="checkbox"/>
3	Hufflepuff	None	<input type="checkbox"/>
4	Slytherin	None	<input type="checkbox"/>
5	Mobile Store 1	Active/collector	<input checked="" type="checkbox"/>

Click to un-lock

Cancel OK

3. Set **Synchronisation type** at the top to Collector
4. Click **OK**

Custom settings

These are set on the **Custom fields** tab of the store preferences in mSupply desktop (**Special > Show Stores**, Double-click on store > **Custom fields tab**).

Setting name	Allowed Value(s) ¹⁾	Description
usesDashboardModule	true or false	Needs to be set to true if using the dashboard
usesVaccineModule	true or false	Needs to be set to true if using the vaccines module
usesCashRegisterModule	true or false	Needs to be set to true if using the cash register
usesPaymentModule	true or false	Needs to be set to true if handling cash payments. There are some (good!) side effects if this setting is true: The sell and cost price columns are shown on Supplier Invoices and are also shown when editing batches in a stocktake where the sell price is editable. See below for examples.
usesPatientTypes	true or false	If set to true then you can choose between "Inpatient and Outpatient" when dispensing. The data is stored in the transact.user1 field. Of course, <u>usesDispensaryModule</u> must be set to true for this to have any effect (see above)

Setting name	Allowed Value(s) ¹⁾	Description
monthsLeadTime	number (0)	The months of lead time - will be multiplied by 30 to use in mobile as months of lead time
monthlyConsumptionLookBackPeriod	number (12)	The number of months to look back when calculating average monthly consumption (AMC)
monthlyConsumptionEnforceLookBackPeriod	true or false	if True, then the full lookback period will be used, even if there is no consumption in those periods. We don't recommend this, but it's here to comply with the rules in some countries

Other preferences

You can set other preferences for mobile in the Store preferences by going to **Special > Show Stores**, Double-click on store > **Preferences tab**) in mSupply desktop:

Here are the preferences and what they do:

Preference	Description
mobile: Enforce lookback period	Information coming soon!
mobile: Uses vaccine module	Information coming soon!
mobile: Uses dashboard module	Information coming soon!
mobile: Uses cash register module	Information coming soon!
mobile: Uses Payment module	Information coming soon!
mobile: Uses patient types	Information coming soon!

Preference	Description
mobile: Uses Hide Snapshot column	Information coming soon!

Other configurations that then affect how mobile behaves

Item	Description
Programs	If you have a master list configured as a program, in mobile you will then be able to perform stock takes or supplier requisitions by program.
Reasons	If you have BOTH positive and negative inventory adjustments, have to apply a reason to stocktake lines with a difference = 0
Prescription Categories	If you have transaction categories with type of "prescription" mobile will display a drop down list of prescription categories to select from
Insurance Providers	If you configured an insurance provider, then mobile will give you the ability to choose a policy, and to edit and create them at the end of a prescription
Payment Types	If you have configured any payment types, they'll show up in a list at the end of a prescription

Dispensary mode

1. Ensure that your store is a Dispensary by choosing **Dispensary** from the drop-down list on the **General** tab of the store preferences.

The screenshot shows a 'New store' dialog box with the following fields and options:

- Store code:** Demo1
- Store type:** dispensary (dropdown menu)
- Name:** Demo store
- Organization name:** (text field)
- Address line 1:** (text field)
- Address line 2:** (text field)
- Address line 3:** (text field)
- Address line 4:** (text field)
- Address line 5:** (text field)
- Postal/Zip Code:** (text field)
- Phone:** (text field)
- Tags:** (text area)
- Responsible officer:** none (dropdown menu)
- Disable this store:** (checkbox)
- Buttons:** Cancel, OK

2. The mobile store needs to have the following field in Custom Fields for the dispensary to be visible in mobile

Of course you will need to synchronise mSupply mobile with the server before the mobile device receives these configuration settings. After sync, your Navigator window will look like this

When the Payments module is on

The cost and sell price are visible on supplier invoices:

Invoice 5

FINALISE

Entry Date: 27/6/2019
