

1. Where to start

Requirements

- A server running mSupply with a web server license registered
- Sync server has a static IP and any network permissions required configured
- A mobile tablet fitting the recommended specifications [here](#)

Information needed

- Store name
- The item master list to be attached to the store
- If you are converting an existing mSupply site (customer) to mSupply Mobile, then you also need to provide the existing customer name that the store is being created for

Creating mobile stores for new sites

EACH individual mobile store needs to have the following steps done on the server, which are detailed later in this Server setup guide:

- Create the sync site [section 2 of this guide](#) **Refer Note below**
- Create the mobile store [section 3 of this guide](#) **Refer Note below**
- Configure the mobile store [section 4 of this guide](#)
- Create user(s) to access the store [section 5 of this guide](#)

Sections 2 and 3 of this guide can now be carried out using the [Sync site wizard](#). These instructions are retained here for reference only.
