

# 1. Where to start

## Requirements

- A server running mSupply with a web server license registered
- Sync server has a static IP and any network permissions required configured
- A mobile tablet fitting the recommended specifications [here](#)

## Information needed

- Store name
- The item master list to be attached to the store
- If you are converting an existing mSupply site (customer) to mSupply Mobile, then you also need to provide the existing customer name that the store is being created for

## Creating mobile stores for new sites

**EACH** individual mobile store needs to have the following steps done on the server, which are detailed later in this Server setup guide:

- Create the sync site [section 2 of this guide](#) **Refer Note below**
- Create the mobile store [section 3 of this guide](#) **Refer Note below**
- Configure the mobile store [section 4 of this guide](#)
- Create user(s) to access the store [section 5 of this guide](#)

Sections 2 and 3 of this guide can now be carried out using the [Sync site wizard](#). These instructions are retained here for reference only.
