

Setting up mSupply Mobile - on the Server

The following details the steps of setting up mSupply from your organisation's mSupply Server

Note - the [mSupply Support Team](#) will complete these steps for you.

The following instructions are for your information only.

As of 2019-10-24, this process is largely manual, with sync sites and stores needing to be created by an operator, one-by-one with a few small bits of code to make some of these processes quicker and more reliable. There is a plan to develop a tool by which virtually all of the process can be automated. Even with such a tool, *at least* the following information will need to be provided manually:

- Store name
- Customer name from which the store is being created (normally the case)
- Item master list controlling visibility for the store

- [1. Where to start](#)
- [2. Create Sync Site](#)
- [3. Create the Store](#)
- [4. Configuring the Store and Dispensing](#)
- [5. Setting up the Users to access the store](#)
- [6. Reviewing the setup](#)
- [7. Setting up the mSupply Mobile app dashboard](#)
