Adverse Drug Reaction Reporting

From version 7.1 mSupply mobile includes the ability to report on Adverse Drug Reactions It is able to be used with AEFI (Adverse Events From Immunisation) reporting.

Set up

Entering an adverse reaction report

To report, a patient must be entered. If you are at the facility where the drug was administered, the patient should already be in the system.

If the patient isn't in the list:

- 1. Tap the **Lookup Patient** button to query the central server to retrieve their name.
- If you still can't find them (which should be rare), then you can tap New Patient to enter their details.

Once the patient is found, tap the **plus** icon in the ADR column to add an adverse event report for that patient.

Patients Prescribers		Q g, j -d 1989 X			×	New patient Lookup patient					
ODE	¢	LAST NAME	¢	FIRST NAME		D.O.B	¢	HISTORY	ADR	EDIT	DISPEN
		Griffin		Joshua		25 Jun 1989		3	0		>

What is shown on the form is configurable on the server. If more than 1 adverse reaction form has been defined, you will be shown a list of forms, and you need to choose the appropriate one before proceeding. If only 1 form has been configured, you will be taken directly to the form to enter the adverse event details.

The fields you enter, their order and the allowed values are all configured on the server, so will vary for each installation. Here's an example that implements a typical ADR form:

×

ADR Form for: Griffin, Joshua	
Adverse Drug Reaction	
acility he facility or workplace where this reaction is being reported	
eporting date	

Reporting date	0
Reporting time	0
Adverse Effects	
Lymphadenopathy Yes No	
Fever	
≥ 38°c	*
CANCEL	SAVE

ADR Form	for: Griffin, Joshua	×
Adverse Drug Reaction		
Adverse Effects		
Lymphadenoputhy Yes No		
Fever		
None		
Flu-like illness		
None		
Chills		
None		-
Fatigue		
None		
CANCEL	SAVE	

Last update: 2021/03/26 05:18

ADR Form for:	Griffin, Joshua	×
Adverse Drug Reaction		
Seizures		
None		
Neurological event		
Thrombocytopenia Yes No		
Vasovagal/Syncope Yes No		
Ves No		
Tachycardia/Palpitations		
CANCEL	SAVE	

Once you have entered all the data you are able to, tap Save

The data will be synchronised to the central server, where it can be displayed on the dashboard (anonymised of course!), or sent to other aggregating systems.
