

Dispensing

Dispensing mode only shows if the store is configured correctly on the server. Read how [here](#)

Patients

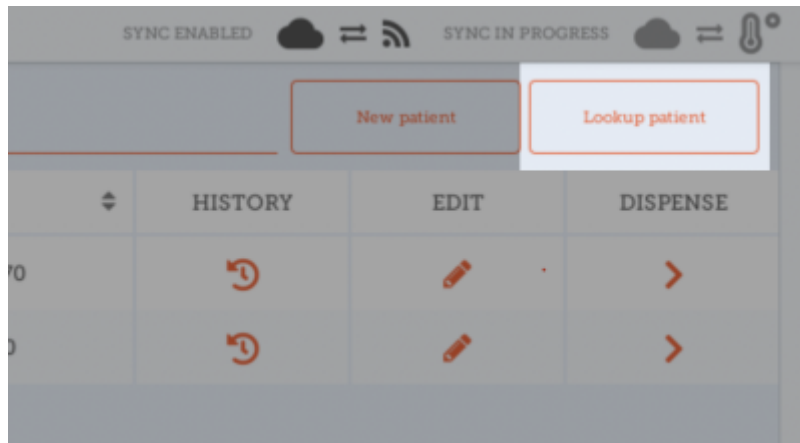

When you tap the **Dispensary** icon you will get a list of your patients. You can search for a particular patient using the field in the search bar.

TIP: you can search by first and last name by using a comma. For example: g, j will search for all patients whose last name starts with G and first name starting with J.

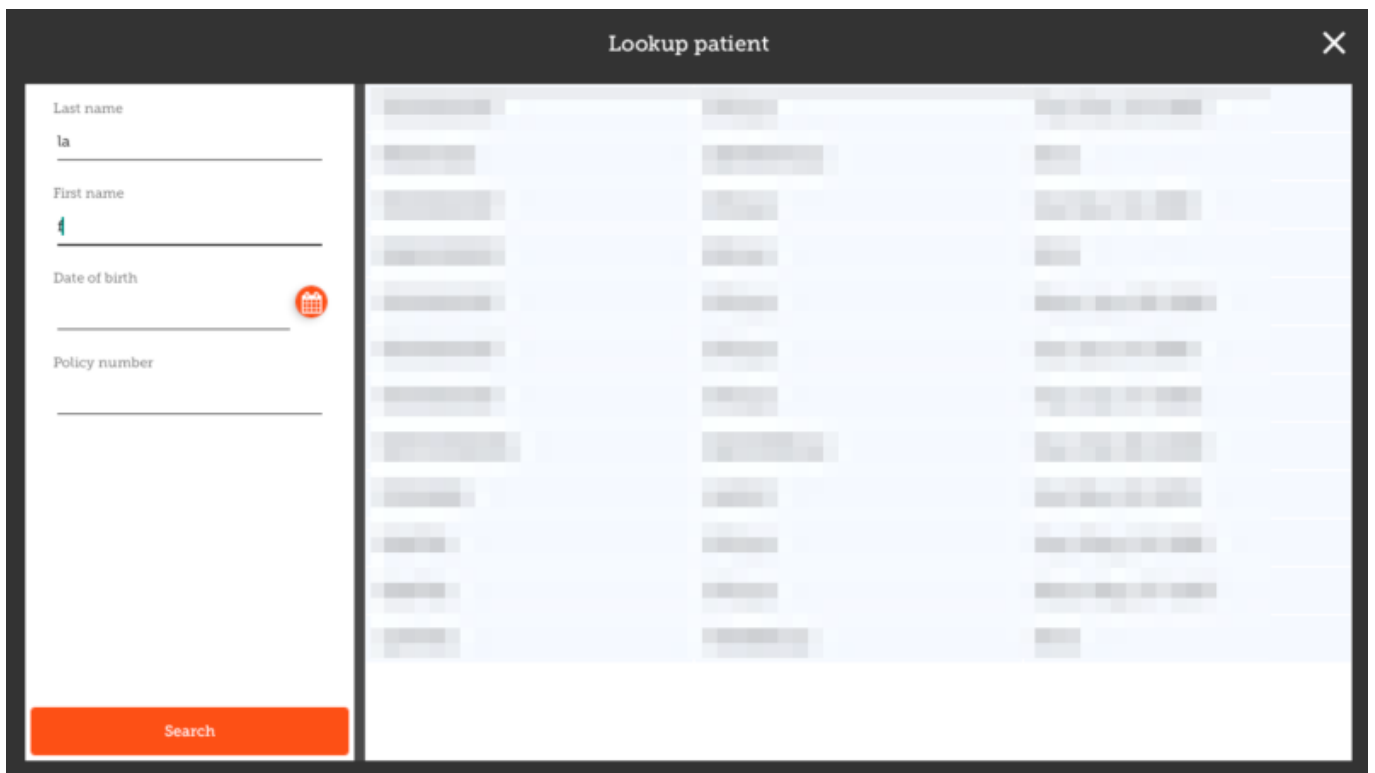

Searching for a Patient (on the server)

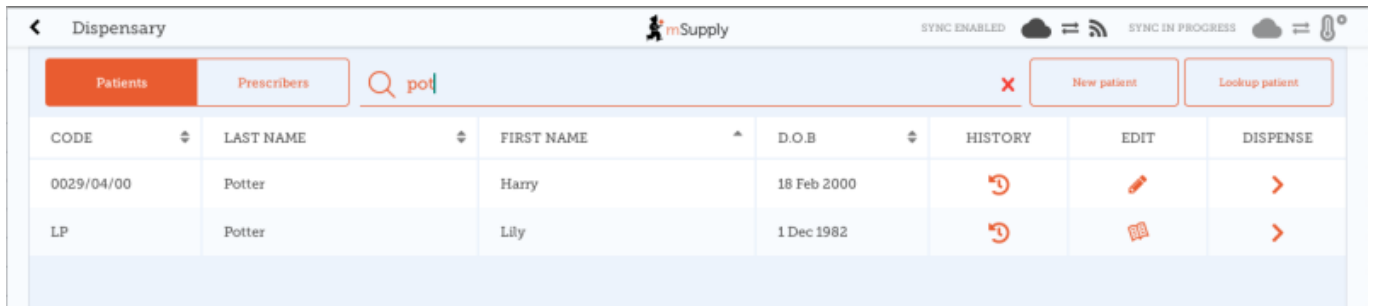

- If a patient does not exist in your current store, and you have internet access, you can search for the patient on the server
- Click the **Lookup patient** button

- You'll see a new window
- Enter some or all of the patient's first name, last name and/or date of birth and insurance policy number (if used)
- Click **Search**

- You will see a list of patients which are configured on the server, but which are not in your local store
- If you see the patient you are looking for, click their name. This will copy their details to your local store and they will appear in your patient list

The screenshot shows the 'Dispensary' screen in the mSupply application. At the top, there are navigation icons, the mSupply logo, and status indicators for 'SYNC ENABLED' and 'SYNC IN PROGRESS'. Below this is a search bar with 'pot' entered. There are two buttons: 'New patient' and 'Lookup patient'. The main area is a table with columns: CODE, LAST NAME, FIRST NAME, D.O.B, HISTORY, EDIT, and DISPENSE. Two rows are visible: one for Harry Potter (DOB: 18 Feb 2000) and one for Lily Potter (DOB: 1 Dec 1982). The 'EDIT' column for Lily Potter shows a book icon instead of a pencil, indicating she is not a local patient.

CODE	LAST NAME	FIRST NAME	D.O.B	HISTORY	EDIT	DISPENSE
0029/04/00	Potter	Harry	18 Feb 2000			
LP	Potter	Lily	1 Dec 1982			

- Note though, that you cannot edit this patient. This is indicated by the book icon in the edit column, rather than the pencil which shows for your local patients.
- If no patients match your criteria you will be shown the message below. Try making your search more general, for example search just for the first letter of their name

Adding a new Patient

- To create a new patient, tap the **New Patient** button.

Editing a patient's details

To edit a patient's details, tap the **edit** button at the end of the row for that patient. Easy!

Viewing a patient's History

You can also view the history for a patient by tapping the **history** button.

The screenshot shows a mobile application window titled "Patient History - Joshua Griffin". It contains a table with the following data:

ITEM CODE	ITEM NAME	QUANTITY	PRESCRIBER
AR33197	ABACAVIR / LAMIVUDINE 60/30 MG CP	1	James Smith

Prescribers

You can show, add and edit prescribers in just the same way as you do for patients.

Simply tap the "Prescribers" toggle button at the top of the window:

To edit a prescriber, tap the edit (pen icon) button for the row you wish to edit. You're then shown the prescriber's details:

Prescriber Details

As for patients, only when you've entered all the required fields you'll be able to save the record.

Searching for a Prescriber (on the server)

- If a prescriber does not exist in your current store, and you have internet access, you can search for the prescriber on the server
- Click the **Lookup prescriber** button

- You'll see a new window
- Enter some or all of the prescriber's first name, last name and/or Registration code
- Click **Search**

- You will see a list of prescribers which are configured on the server, but which are not in your local store
- If you see the prescriber you are looking for, click their name. This will copy their details to your local store and they will appear in your prescriber list

The screenshot shows the 'Dispensary' screen in the mSupply application. At the top, there are navigation tabs for 'Patients' and 'Prescribers', with 'Prescribers' selected. A search bar is present with the text 'Search by Last Name, First Name'. To the right of the search bar are buttons for 'New Prescriber' and 'Lookup prescriber'. Below the search bar is a table with the following columns: CODE, LAST NAME, FIRST NAME, and EDIT. The table contains four rows of data:

CODE	LAST NAME	FIRST NAME	EDIT
293487	Prince	Bertha	
298347298	Smith	Freda	
SLUG	Slughorn	Horace	
POP	Pomfrey	Poppy	

- Note though, that you cannot edit this prescriber. This is indicated by the book icon in the edit column, rather than the pencil which shows for your local prescribers.
- If no prescribers match your criteria you will be shown the message below. Try making your search more general, for example search just for the first letter of their name

Dispensing to a patient

- Firstly, find the patient to dispense to (as above for viewing/editing a patient)
- Then click the **Dispense** button on that row.

Dispensing is a three step process. Each step must be completed before you can move to the next step

1. Step 1 you must select a prescriber by clicking on the SELECT icon
 - NOTE: You can press the HISTORY and EDIT icons next to the patients name to edit the patients details or view their history at any time.
 - You can filter the list using the search bar
 - Once you have selected a prescriber, you can edit the prescriber at any time using the EDIT icon next to the prescribers name
2. Step 2: You must select an item to dispense by selecting the row on the left hand side. You can filter the items using the search bar

1. Step 3: You can view the final results of the prescription and add any other details such as a comment.

Tapping the **Complete** button will finalise the prescription. That means that it's locked- you can't edit it any more.

That was easy!. If you've enabled payments, you can go to the next step to receive payment. If not, you'll continue and dispense the next prescription.

Payments

The payments module needs to be configured on the server, so if it's turned off, you won't see it. Configuration instructions are [here](#) The 2 configuration settings that must be set to "true" are:

- usesDispensarymodule
- usesPaymentsmodule

Once enabled, when you arrive at the summary page where you check the details of a prescription, you will be shown a payment summary and each item will show its price:

The dropdown list under the “Payment” allows you to select the type of the payment. (Types are configured on the server).

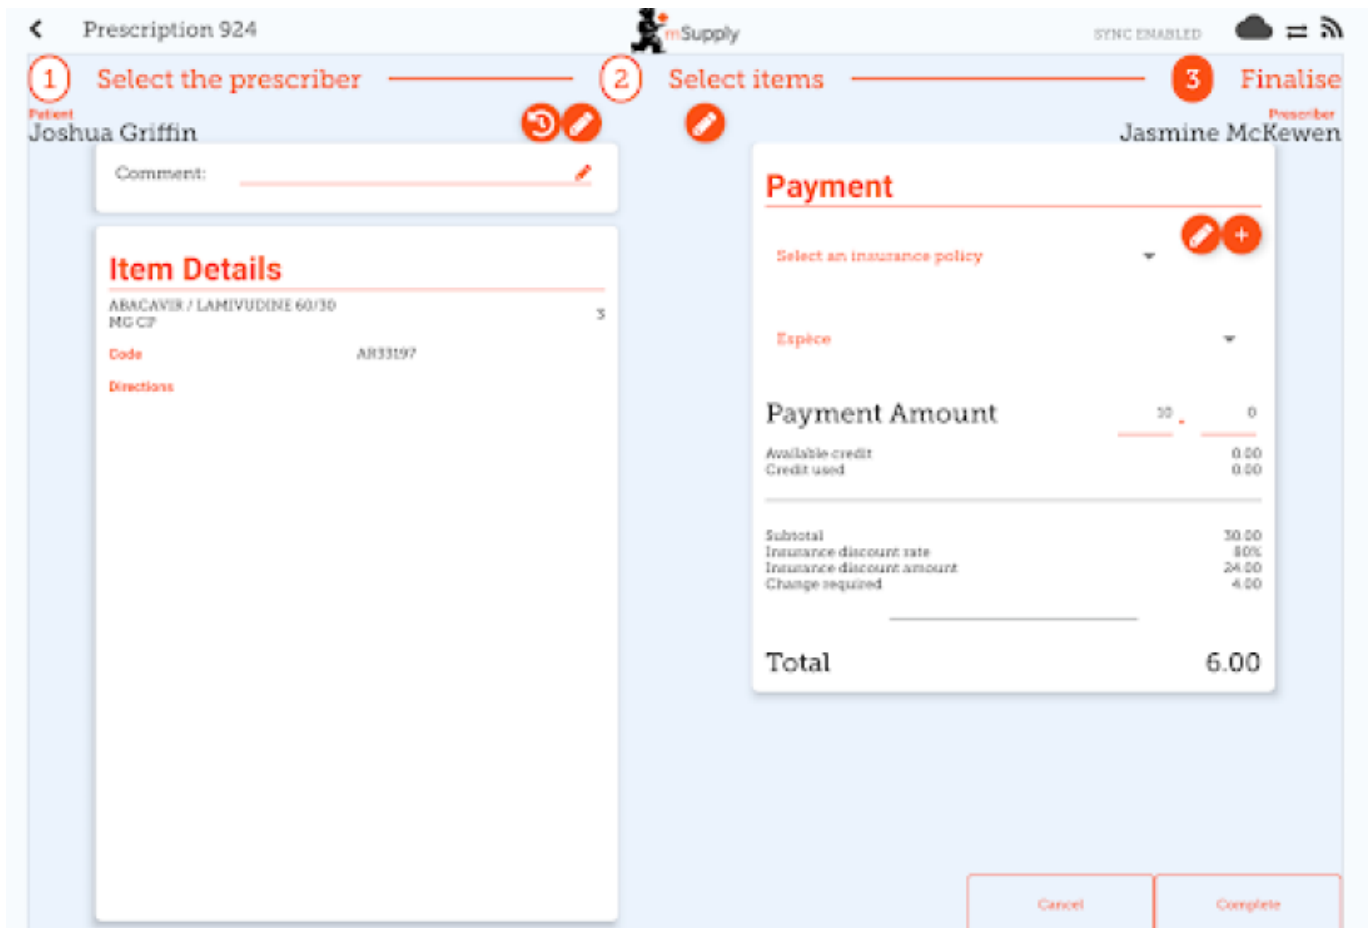

- The **Payment Amount** is the amount the patient is paying
- If they have any available credit, this will be listed under the **Payment Amount**
- There can only be a **Payment Amount** less than the **Total**, if the patient has sufficient available credit to cover the difference.
- The amount of credit is shown under **Credit Used**
- The change required is the amount of change to give to the patient
- It is only possible to finalise a prescription when payments are enabled, when the payment amount is a valid value

Here's an example if the patient doesn't have enough credit:

And here's an example of where the payment gave you more in cash than the amount to pay, and you need to give them back change:

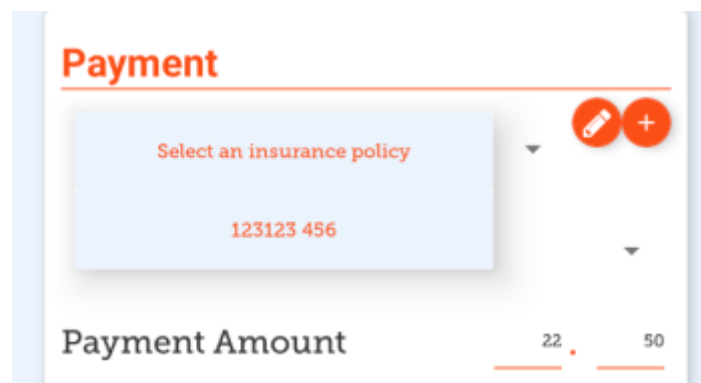

Insurance

If the server has insurance providers enabled, the mobile store will also.

This will enable the insurance drop-down list and the **add** button (The orange “plus” button to the right):

When entering the payment details, if the patient has an insurance policy, you can select it from the drop-down list:

You can use the **Edit** (the “pen”) or **Add** (the “plus”) buttons to add or edit insurance policies.

If you click the **Add** button you can add an insurance policy:

The **Save** button is only enabled when you've entered a valid value in each field that is labelled as "required".

If you have set up transaction categories on the server, then you'll be able to choose one at the top left of the window:
