Supplier Invoices

Supplier Invoices will appear in your system automatically once they have been created by your Internal Supplier, either when the [Supplying store processes your Supplier Requisition](#), or if they 'push' stock to your store.

Only supplier invoices from **Internal Suppliers** (mSupply stores in your system) will appear automatically. If you are receiving stock from an **External Supplier** (**not** an mSupply store), then a **Supplier Invoice** will **not** automatically appear. You will need to create one - see [Create a new Supplier Invoice for an External Supplier](#).

Let's go through each step of processing a **Supplier Invoice** from an **Internal Supplier**.

Open Supplier Invoices

Click on Supplier Invoices

A list of Supplier Invoices will appear.

You can use the **Status** column to check the processing status of each invoice.

- **In Progress:** You have not yet processed the stock in to your store. It might not have even arrived yet!
- **Finalised:** You have processed the stock in to your store. You can not edit this supplier invoice.

5	Finalised	Thu Jul 28 2016	Stock transfer (Invoice from customer stock history)
1	Finalised	Wed Jul 27 2016	Stock transfer (Invoice from customer stock history)

If you are receiving stock from a supplier that is **not** an mSupply store, then you will need to create it manually - see [Create a new Supplier Invoice for a non-mSupply supplier](#).

Edit the supplier invoice

Tap on the Supplier Invoice for the order you have received. This will open the Supplier Invoice.

The Supplier Invoice *should* match the stock you are receiving, but it may not. Just as with paper invoices, it is very important that you check everything against the electronic invoice on mSupply Mobile when you order arrives.

Check each line on the supplier invoice in mSupply Mobile against what you have actually received. If you have received a different quantity than what is displayed, or the batch or expiry details of the stock received are different to what appears in the supplier invoice, tap on the mismatching field(s) to adjust:
