

User Guide - mSupply Mobile

Supplier Requisitions (Program Orders)

You would like to order some stock from your supplier for a [program](#).

You need to create a **Program Order**, which will automatically populate your requisition with items in the program.

Click on Supplier Requisitions

When your store has access to at least one program, creating a Supplier Requisition will prompt you to choose from either a **Program Order** or a **General Order**.

Click on Program Order

Select the Program, Supplier, Order Type and Period

This information must be completed **sequentially**. The arrow points to which step you are up to, and the tick shows which steps have been completed.

When selecting the **Order Type**, further details can be seen on the right:

- **Maximum MOS:** maximum number of months' stock to be kept for each item, which will help determine the suggested quantities to order
- **Threshold MOS:** items with number of months' stock *less* than this value will appear in the order by default
- **Maximum orders per period:** maximum number of orders that can be placed in a given period
- **Max items:** maximum number of items allowed to be ordered for an emergency order (an alert will appear if the maximum number of items is exceeded)

When selecting the **Period**, further details can be seen on the right:

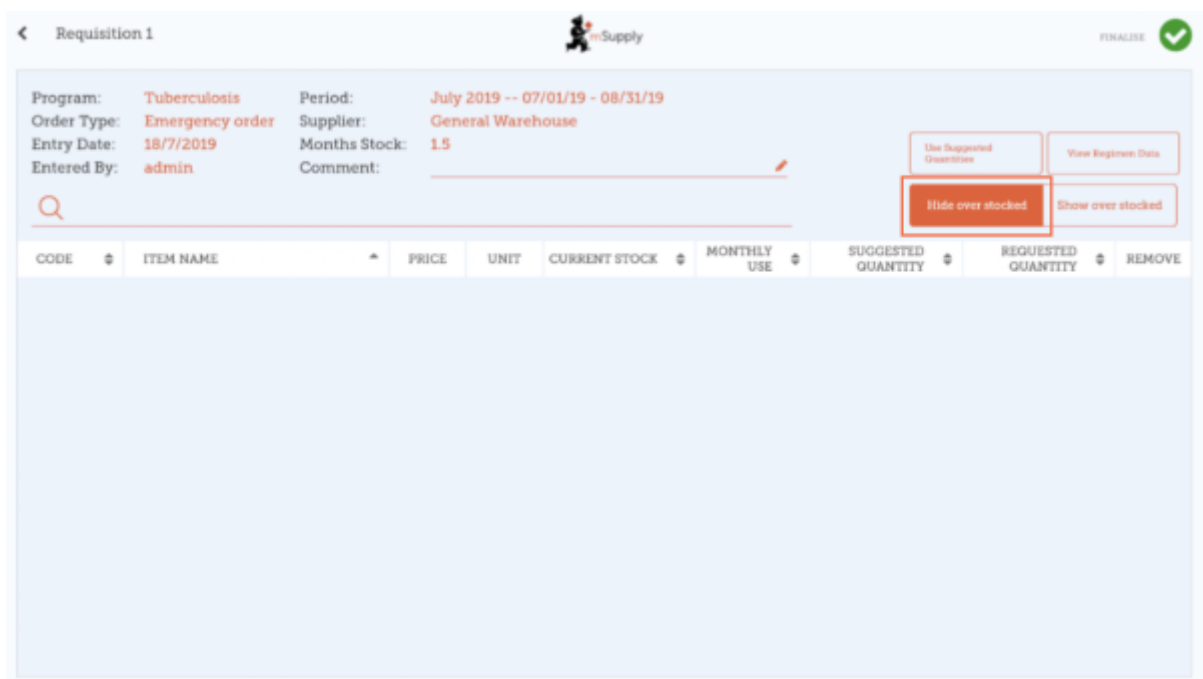

- **Period dates** i.e. the interval of the period
- **Number of requisitions already created** for the same period, supplier and order type

Click OK and review the requisition

The requisition is created and is populated with all program items.

Note that you cannot add additional items to a Program Requisition.

Why are there are no items visible in this example?

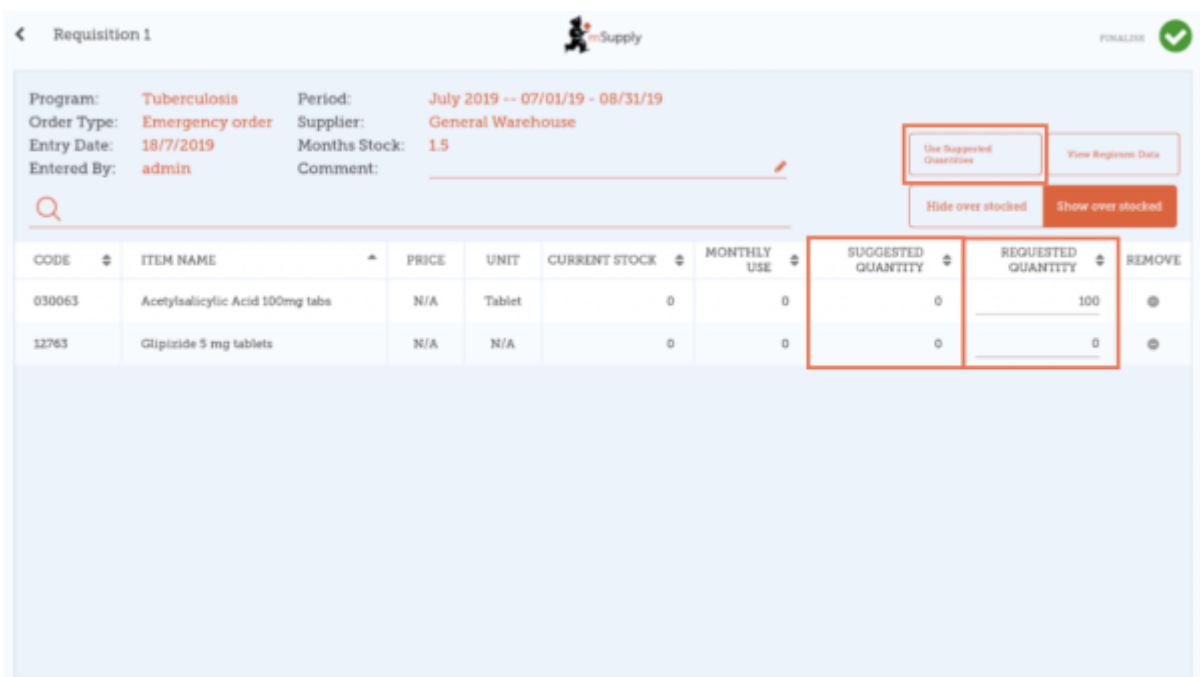

- The **Hide Over Stocked** button is selected by default, which hides all items that have stock over the threshold MOS.
- All the stock on hand in this example is over the threshold MOS, so no items are visible.
- When you click the **Show Over Stocked** button, all items that are over the threshold MOS appear.

Note that the **Price** displayed in a Program Requisition is the price the supplier sells the item for.

Entering quantities to order

By default, the suggested quantity for a program requisition will be set to the suggested quantity. If you have edited suggested quantities, the **Use Suggested Quantities** button will reset the requested quantities to their original values.

If you want to manually change a requested quantity you can do so.

However, if you have [reasons configured on the mSupply server](#) you will also see a reasons column,

Requisition 27 FINALISE 

Entry Date: 3/3/2020 Supplier: [redacted]
Entered By: [redacted] Months Stock: [redacted]
Comment: [redacted]

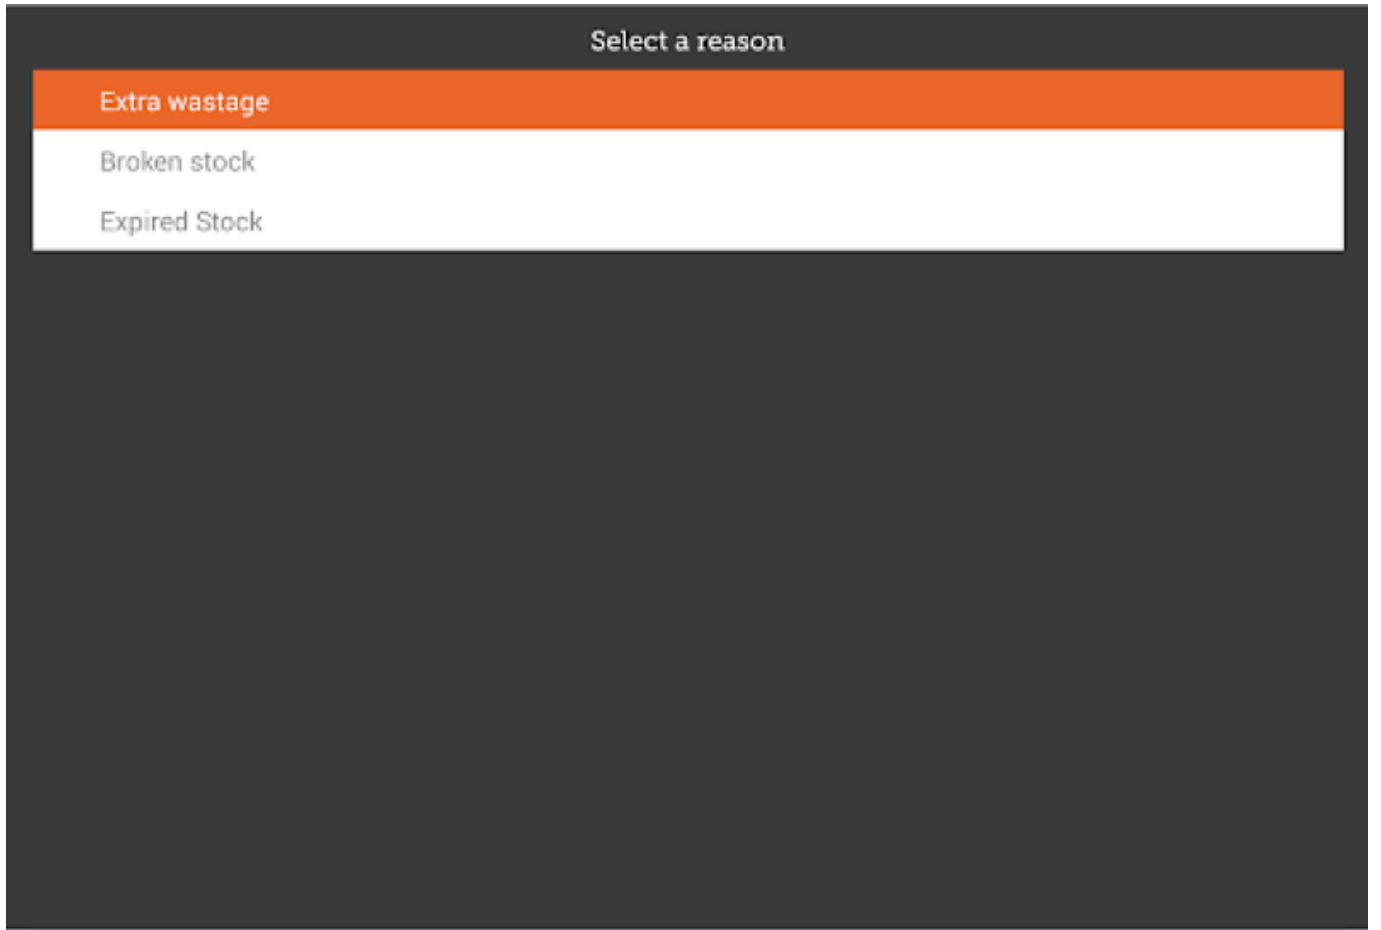

Search by item name or item code

Use Suggested QuantitiesNew Item

Create Automatic OrderAdd Master List Items

ITEM CODE	ITEM NAME	CURRENT STOCK	MONTHLY USE	SUGGESTED QUANTITY	REQUESTED QUANTITY	REASON	REMOVE
[redacted]	[redacted]	38	15021	18739	18739	N/A	
[redacted]	[redacted]	2	41040	51299	51299	N/A	
[redacted]	[redacted]	90	41041	51212	51212	N/A	

You will have to choose a reason whenever the requested quantity differs from the suggested quantity:

The reason is shown after you've chosen one:

The screenshot shows the 'Requisition 27' interface in mSupply. At the top, there are fields for 'Entry Date: 3/3/2020', 'Entered By:', 'Supplier:', 'Months Stock:', and 'Comment:'. On the right, there are buttons for 'Use Suggested Quantities', 'New Item', 'Create Automatic Order', and 'Add Master List Items'. Below these is a search bar with the text 'Search by item name or item code'. The main part of the screen is a table with the following columns: ITEM CODE, ITEM NAME, CURRENT STOCK, MONTHLY USE, SUGGESTED QUANTITY, REQUESTED QUANTITY, REASON, and REMOVE. The table contains three rows of data for ABACAVIR / LAMIVUDINE 600/300 MG CP.

ITEM CODE	ITEM NAME	CURRENT STOCK	MONTHLY USE	SUGGESTED QUANTITY	REQUESTED QUANTITY	REASON	REMOVE
AR33297	ABACAVIR / LAMIVUDINE 600/300 MG CP	30	15021	18733	1873	Expired St...	
AR33295	ABACAVIR 300 MG CP	2	41040	51299	51299	N/A	
AR33296	ABACAVIR/LAMIVUDINE 600/300 MG CP	90	41040	51212	51212	N/A	

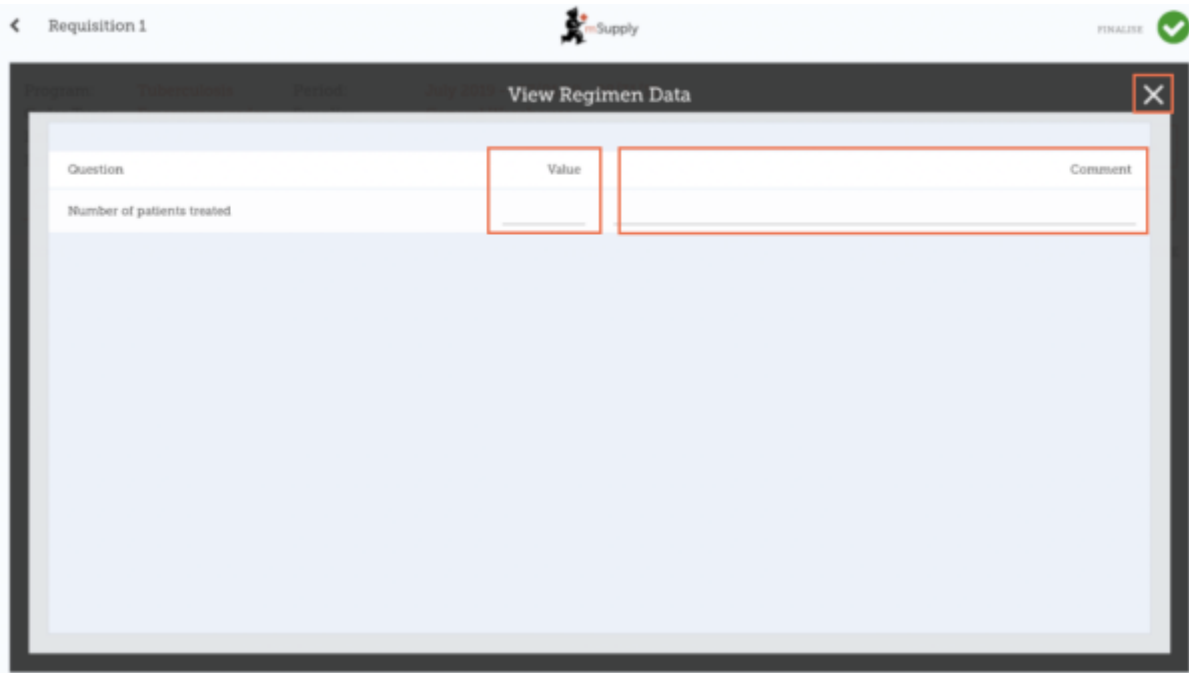

If you tap on a reason, you'll be able to edit it in the same way you choose a new reason (above).

Entering Regimen Data

The screenshot shows the 'Requisition 1' interface in mSupply. It features fields for 'Program: Tuberculosis', 'Order Type: Emergency order', 'Entry Date: 18/7/2019', 'Entered By: admin', 'Period: July 2019 -- 07/01/19 - 08/31/19', 'Supplier: General Warehouse', and 'Months Stock: 15'. On the right, there are buttons for 'Use Suggested Quantities', 'View Regimen Data', 'Hide over stocked', and 'Show over stocked'. Below is a search bar and a table with columns: CODE, ITEM NAME, PRICE, UNIT, CURRENT STOCK, MONTHLY USE, SUGGESTED QUANTITY, REQUESTED QUANTITY, and REMOVE. The table lists two items: Acetylsalicylic Acid 100mg tabs and Glipizide 5 mg tablets.

CODE	ITEM NAME	PRICE	UNIT	CURRENT STOCK	MONTHLY USE	SUGGESTED QUANTITY	REQUESTED QUANTITY	REMOVE
050063	Acetylsalicylic Acid 100mg tabs	N/A	Tablet	0	0	0	100	
12763	Glipizide 5 mg tablets	N/A	N/A	0	0	0	0	

If regimen data is necessary for the requisition, enter values and comments then close the screen.

When you are completely sure that everything is correct...

Click the **Finalise** button, then **Confirm** and your order will go to the supply store.

Even if you don't have internet at the time, it's ok! The order will send automatically when you do have internet later.
