Cancel OK & Next OK

If you want to record when a patient has refused a vaccine, you need to create a patient event. Otherwise, no record will be created.

The 'Patient event list...' window displays a table with four columns: Code, Description, Event type, and Unit. The table contains three rows of data: NT (Note), PCD (Patient clinical data), and RV (Refused vaccination). The RV row is highlighted in blue. The window also features 'New' and 'Delete' buttons at the top left and an 'OK' button at the bottom right.

Code.	Description	Event type	Unit
NT	Note	DS	
PCD	Patient clinical data	OB	
RV	Refused vaccination	OB	

The 'Edit patient event' window allows editing the details of a patient event. It includes fields for Code (RV), Description (Refused vaccination), Event type (a dropdown menu), and Units (an empty text field). The window also features 'Cancel' and 'OK' buttons at the bottom right.

If you want to record extra patient information during vaccinations, get in contact with The mSupply Foundation as we have no interface for you to create the forms, yet.

Once complete, your mSupply mobile interface will look like this:
