If you want to record when a patient has refused a vaccine, you need to create a patient event. Otherwise, no record will be created.
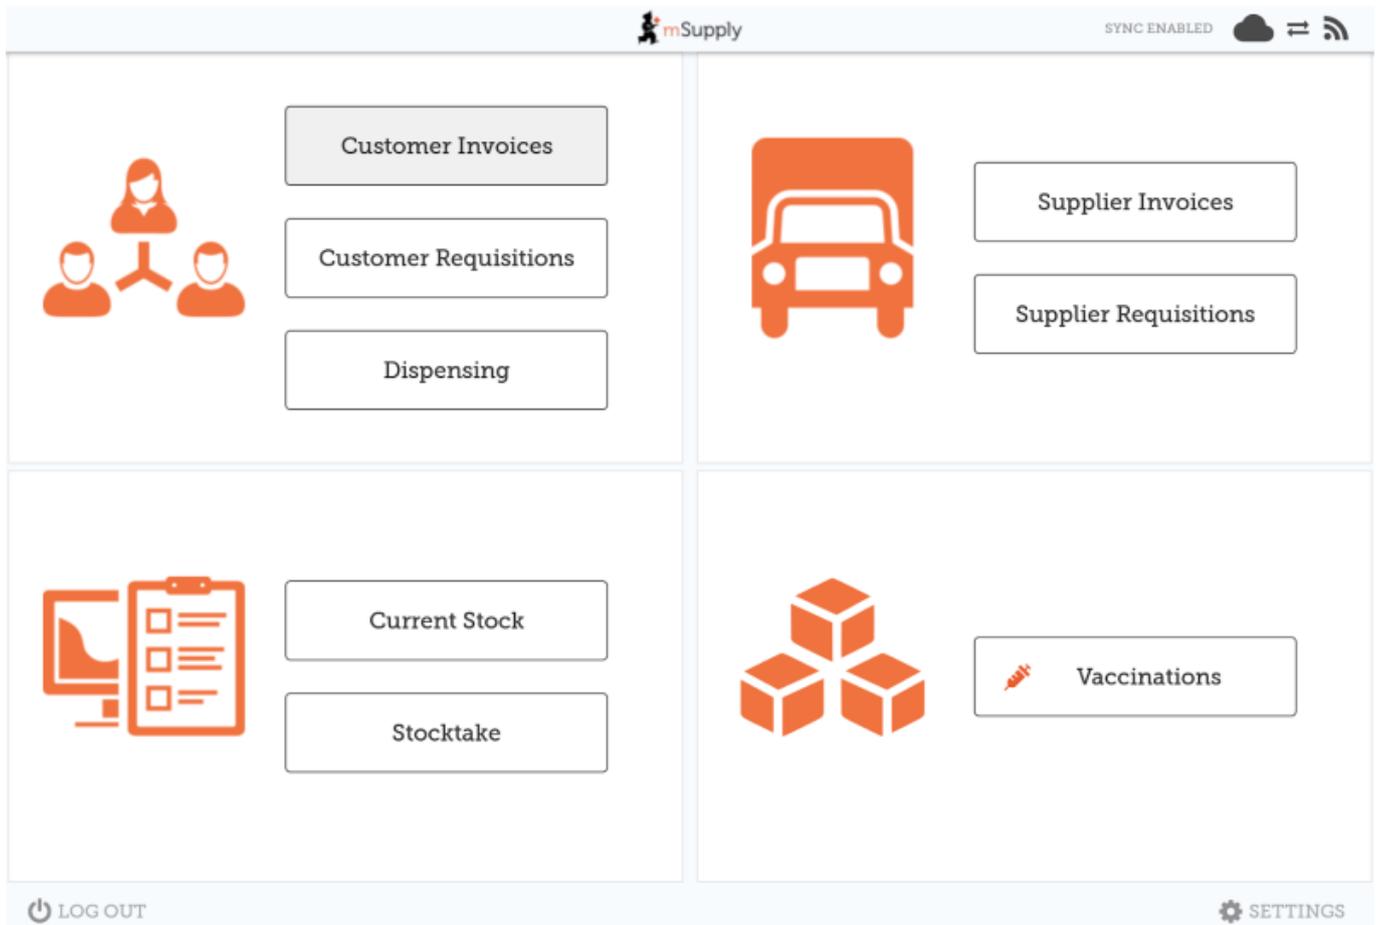

If you want to record extra patient information during vaccinations, get in contact with The mSupply Foundation as we have no interface for you to create the forms, yet.

Once complete, your mSupply mobile interface will look like this:

Log in and synchronise once, and then your interface will show vaccine dispensing as an option:

Patient Extra Information Setup

We use the JSON-Schema standard to define both what information can be shown, and the constraints on that information. Constraints can include:

- If information is compulsory
- The type of value (e.g. only a number)
- Minimum and Maximum values
- Default values

Below is an example of a JSON schema The schema and the resulting user interface can be viewed here

Example Schema

```
{
  "type": "object",
  "title": "Extra information",
  "properties": {
    "respondentContactData": {
      "title": "Respondent Contact Data",
      "description": "Contact data of the respondent if the respondent is
```

```
not the patient.",
      "type": "object",
      "properties": {
        "firstName": {
          "title": "First Name",
          "description": "The first name of the respondent",
          "type": "string",
          "maxLength": 2,
          "errorMessage": "Hey! that names way to long, buddy!"
        },
        "lastName": {
          "title": "Last Name",
          "description": "The last name of the respondent",
          "type": "string",
          "minLength": 50,
          "errorMessage": "Hey! that names way to short, buddy!"
        },
        "relationshipToPatient": {
          "title": "Relationship to patient",
          "description": "The relationship between the respondent and
patient",
          "type": "string",
          "enum": [
            "Mother",
            "Father",
            "Sister",
            "Brother",
            "Aunty",
            "Uncle",
            "Grandmother",
            "Grandfather",
            "Friend/Neighbour",
            "Other"
          ]
        }
      }
    },
    "patientClinicalData": {
      "title": "Patient Clinical Data",
