# Vaccination Monitoring Dashboards

If you are using mSupply mobile for registering participants, dispensing vaccines, and recording adverse events, then you need a mechanism to report on all this information, and to manage your program. The mSupply dashboard is your friend. We have created a series of dashboards specifically for these tasks. Here's an example

Here the dashboard shows a list of people needing to be contacted for their 2nd dose (This can be exported to excel and uploaded to an SMS sending service to send a reminder)

The screenshot shows a mobile application interface for 'Patients'. A sidebar on the left contains icons for search, add, view all, refresh, notifications, and settings. The main content area is titled 'Patients' and features a table titled 'People due for second dose'. The table has four columns: Name, location, Date 1st Dose, and Mobile #. Two rows of data are visible: Joe Smith from Kolonga (1st dose 01/04/2021, mobile 2984723) and Sione Peters from Vava'u (1st dose 03/04/2021, mobile 9834721). An 'Export' button is located at the bottom right of the table.

Name	location	Date 1st Dose	Mobile #
Smith, Joe	Kolonga	01/04/2021	2984723
Peters, Sione	Vava'u	03/04/2021	9834721
