

mSupply Table

This is a custom panel which will need to be installed on your server. Contact mSupply support if this panel is not available to you. The mSupply table is an extension of the bundled Table plugin, which adds * clickable actions to cells which update filter values * a button which allows exporting the data direct to excel (requires the msupply-dashboard-app plugin also)

Be aware that it also removes the Filter functionality of the bundled table plugin.

The screenshot shows the 'Item Stock' interface. On the left, a table titled 'Stock on hand' lists various medical supplies with columns for Item, Unit Price, Stock, and Source. On the right, a map titled 'Months of stock by Store' shows New Zealand with colored circles indicating stock levels at different locations. Below the map is a legend for stock levels: < 1 (red), 1-6 (orange), 6-12 (green), and 12+ (blue). At the bottom, there is a section for selecting a single item, with columns for Stores, Unit Price, AMC, Stock on Hand, Qty 1, Batch 1, Expiry 1, Qty 2, Batch 2, Expiry 2, Qty 3, Batch 3, Expiry 3, and Qty 4.

To use, select the msupply-table visualisation option:

The new options available in the **Display** section are:

▼ **Display**

Show header

To display table's header or not to display

Show export button

Display or hide the export to excel option

Export button title

The title of the export button

* **Show export button** toggles display of the export button * **Export button title** which allows customising of the export button text

And the option to link a cell to a variable is per field, so it can be specified as an override to select this for a single column only:

▼ **Override 1**

Fields with name

Linked Variable

Specify the name of a variable to update when this field is clicked
